SEE THE VICTORY

Shenzhen New Glory Intelligent Technology Co., Ltd. is a pioneering national high-tech enterprise established in 2012, specializing in innovative personal protective equipment (PPE), mixed reality (MR) smart devices, and optoelectronic products. We are dedicated to delivering high-performance solutions that enhance safety and operational efficiency across various sectors, including military, law enforcement, labor protection, extreme sports, scientific research, and field operations.

Leveraging our strong R&D capability, we develop cutting-edge technologies such as nano-diamond film, laser protection, and anti-fog solutions, securing 5 invention patents and 33 utility model and design patents. Our commitment to innovation drives us to create the best protective eyewear, ensuring that our customers can rely on superior vision protection in critical situations.

We are proud to be one of the suppliers for the Chinese military, reflecting our unwavering commitment to continuous R&D and product quality. We meet rigorous standards and showcase the excellence of our engineering and manufacturing processes, ensuring that our clients receive unparalleled protection and performance.

S - Standard

We are a trusted supplier for the Chinese military, relentlessly enhancing our products through cutting-edge research and development.

A - Agility

Our skilled team and advanced equipment enable swift project turnaround, adapting quickly to your evolving needs.

F - Faithfulness

We honor our commitments by assigning a dedicated account manager to provide personalized support and build lasting trust.

E - End-to-End Support

Our comprehensive teams and resources guide you from idea to launch, transforming your vision into reality at every stage.

Quality Assurance
We prioritize selecting high-quality materials.

Waterproof Silicone Gasket
This silicone gasket adapts to the contours of the face, achieving an optimal fit after several uses.

Anti-Fog Mirror
The lenses are clear and transparent. Each pair of glasses is treated with an anti-fog coating. To preserve this coating, avoid wiping the inside of the swimming goggles, as this could remove the coating and impair performance.

GAS HALF MASK

MODEL: HX-620

USD 22

Gas Half Mask 620 – designed for reliable protection against hazardous fumes and particles in industrial environments. This mask features flame-retardant materials and an airtight breathing valve, ensuring safety and comfort in high-risk settings. Built to GB2890-2009 standards, it minimizes leakage and dead space while providing an expansive field of view. Lightweight and with low breathing resistance, it is ideal for extended wear. Suitable for welding, chemical processing, mining, and pesticide spraying, it offers a cost-effective solution when paired with the appropriate filter box.

CONSTRUCTION HALF MASK

MODEL: HX-8200

USD 39

The Construction Half Mask – delivers reliable protection and comfort across industrial settings. Meeting GB2890-2009 standards, these masks feature low breathing resistance, a contoured fit, and are made from lightweight medical-grade silicone for extended wear. Offering excellent field-of-view coverage and minimal leakage, they are ideal for tasks like welding, painting, chemical processing, and more. Low resistance valves ensure smooth airflow while maintaining a secure seal. Pair with the appropriate filter box for optimal safety in various environments.

LED Portable Work Light – engineered for versatility and durability, this work light is an essential tool for mechanics and craftsmen alike. Featuring three-tone lighting and a waterproof rating, it ensures reliable performance in various conditions. The light offers two-speed dimming and a side light, along with a magnetic, explosion-proof design for added safety and convenience. With impressive battery life on various settings, it's perfect for extended use in workshops or outdoor projects. This cost-effective LED work light makes an excellent gift for occasions like Christmas, New Year, birthdays, Thanksgiving, and Father's Day, catering to men, family members, and professionals alike.

PORTABLE EXPLOSION-PROOF SEARCHLIGHT

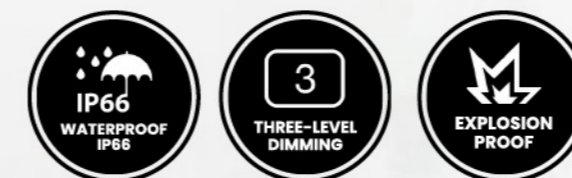

MODEL NO: OGF4B

WARRANTY: 6 MONTHS
USD 184

MEDIUM

Available in two sizes, the OGF4B Medium and OGF4C Small, this searchlight is lightweight yet powerful, offering extended operating hours—up to 8.5 hours on strong light mode and 17 hours on working light mode. The robust design includes a high-hardness alloy shell and a maintenance-free solid-state LED light source, ensuring long-lasting reliability. With quick recharging capability and an operating cycle of approximately 1,000 charges, this searchlight is ideal for use in search and rescue operations, industrial settings, and emergency situations. Its ergonomic design, combined with efficient energy usage, makes it both functional and portable for extended use.

Multifunctional High-Intensity Explosion-Proof Inspection Flashlight -

Built for reliability and versatility, the Multifunctional High-Intensity Explosion-Proof Inspection Flashlight is designed to perform in hazardous environments where durability and precision are critical. Featuring three levels of dimming and IP66 waterproof protection, this flashlight provides powerful illumination for inspections and emergency situations. Its high-power LED light source delivers 300 lumens, offering strong, clear lighting, whether in strobe or steady modes.

With a lightweight design, weighing only 0.18kg, the flashlight is easy to carry and handle for extended periods. It offers up to 7.5 hours of continuous use on strong light mode, with efficient power consumption thanks to its 2.6Ah battery. Made from high-hardness alloy and coated with a special vacuum reflection layer for optimal light dispersion, it is built to last through tough conditions. The flashlight can be recharged within 6 hours and operates through approximately 1,000 charge cycles, making it a reliable tool for professionals working in industrial settings, emergency services, and security inspection tasks.

LED PORTABLE MULTIFUNCTIONAL WORK LIGHT

MODEL NO: GZD-4

WARRANTY: 6 MONTHS

USD 288

LED Portable Multifunctional Work Light – designed for versatility and durability. With three dimming levels and a four-stage power display, it provides optimal brightness for various tasks. Constructed from high-strength engineering plastics and aluminum alloy, it features an IP65 waterproof rating and exceptional drop resistance. Powered by a high-energy, memory-free lithium-ion battery, this work light is perfect for both indoor and outdoor use.

TUNNEL LED LIGHT

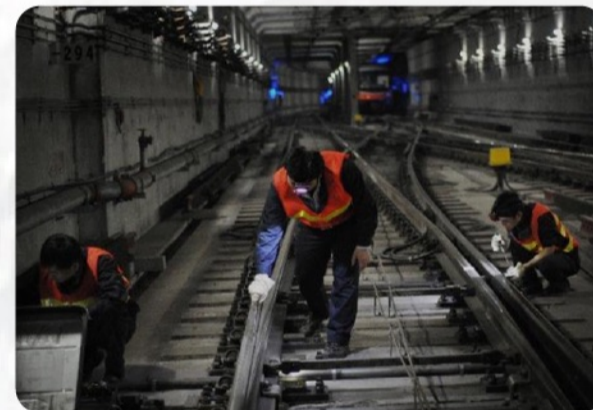

MODEL NO: OGP30

USD 154

WARRANTY: 6 MONTHS

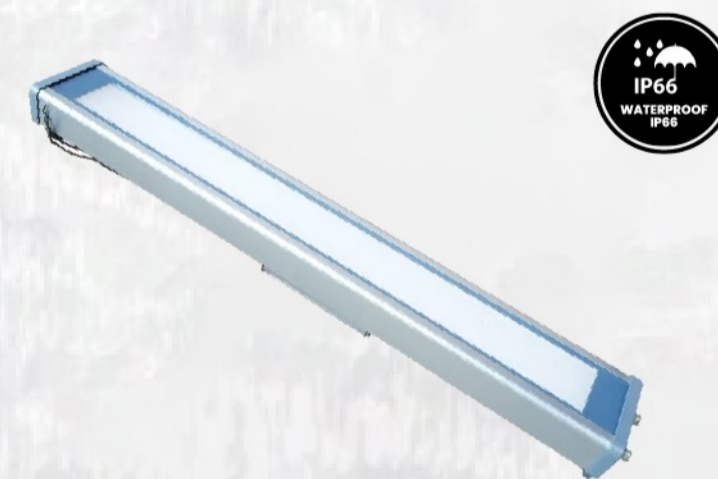

Tunnel LED Light – engineered for optimal performance in demanding environments. This lighting solution offers floodlighting capability, ensuring broad illumination for tunnels and other expansive areas. Equipped with a durable input cable, it is designed for easy installation and reliable operation. The emergency configuration ensures uninterrupted lighting in critical situations, providing enhanced safety. Built to withstand harsh conditions, it features an anti-corrosion grade of WF2, making it suitable for challenging environments. With a protection grade of IP65, this light is dust-tight and resistant to water, ensuring long-lasting durability and performance in outdoor or industrial settings.

LINEAR LED IN GROUND LIGHT

MODEL NO: OGLL3032

WARRANTY: 6 MONTHS

USD 120

Linear LED In Ground Light – designed to enhance outdoor beauty and security. It offers flood, fixed, and emergency lighting with an IP66 protection rating and WF2 anti-corrosion level for durability. Multiple installation options make it versatile for residential and commercial use, providing reliable lighting in any environment.

MODEL NO: OGLL4060

WARRANTY: 6 MONTHS

USD 154

EXPLOSION PROOF GAS STATION LIGHT

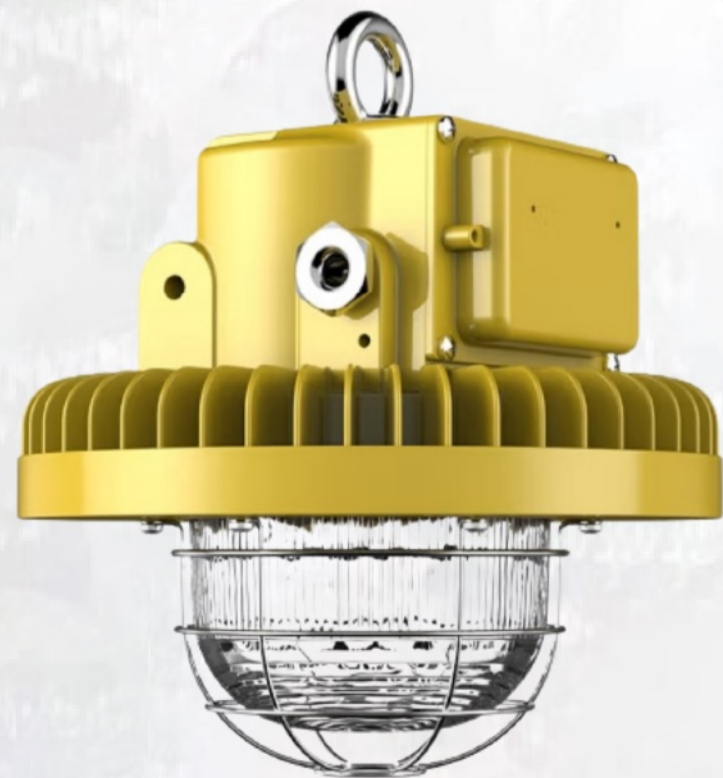

MODEL NO: OGEXPTD-70WNZ

USD 257

WARRANTY: 6 MONTHS

Explosion Proof Gas Station Light – engineered for maximum safety and durability in hazardous environments. This industrial-grade lighting solution is designed to operate in environments where gas and dust explosions are a risk, offering an anti-corrosion rating of WF2 and a robust IP66 waterproof design. Ideal for flour mills, paper mills, gas stations, and other flammable and explosive settings, the light ensures reliable performance under extreme conditions. Its rugged construction and advanced safety features make it an essential choice for high-risk industrial applications.

LED HIGH BAY LIGHT

MODEL NO: OGHB-100

USD 260 WARRANTY: 6 MONTHS

LED High Bay Light – engineered for broad, efficient lighting and flexible application in industrial settings. This light offers a wide-range illumination with adjustable angles, ensuring optimal coverage for various environments. Built with a protection level of IP65, it is resistant to dust and water, making it ideal for outdoor and high-moisture areas. Additionally, its WF2 anti-corrosion rating ensures long-lasting durability, even in harsh conditions. Perfect for factories, warehouses, and large-scale facilities, this versatile light combines reliability with high performance.

LED FLOOD LIGHT

MODEL NO: OGF6-50

USD 167

WARRANTY: 6 MONTHS

LED Flood Light – designed for versatile and efficient outdoor lighting in demanding environments. This floodlight offers wide-range illumination with multi-angle adjustability, ensuring coverage in various settings. Built with an IP65-rated weatherproof casing, it delivers reliable protection against dust and water, making it ideal for outdoor use. The anti-corrosion WF2 certification ensures long-lasting durability, even in harsh environments. Perfect for industrial, security, or landscape lighting, this floodlight combines functionality and durability for professional applications.

LED LOADING DOCK LIGHT

MODEL NO: ZXD-1

USD 288

WARRANTY: 6 MONTHS

LED Loading Dock Light – designed for high visibility and safety in industrial settings. Ideal for vehicle maintenance, field operations, and loading tasks, it features a durable copper-free aluminum alloy construction with a hard anodized shell for wear and corrosion resistance. Lightweight and robust, this light ensures reliable performance and enhanced safety in demanding environments.

EMERGENCY LIGHTS

MODEL NO: OGPE500

USD 1708 WARRANTY: 6 MONTHS

Emergency Light – versatile and durable for critical situations. It features three modes: strong light, working light, and SOS flash. With a lifespan of 100,000 hours and a protective silicone exterior, it withstands impacts and harsh conditions. Includes a charging port and an emergency reverse charging function for powering devices. Ideal for emergencies and outdoor use.

HEAD LIGHT

MODEL NO: OGH3

MAGNET: WITH / WITHOUT

**WITHOUT MAGNET: USD 77
WITH MAGNET: USD 80**

WARRANTY: 6 MONTHS

Head Light – a versatile, explosion-proof headlamp that securely attaches to any helmet, providing safe and reliable illumination in flammable and explosive environments. It offers both near and far lighting, ensuring visibility in various work conditions. The 360° rotating lamp head allows easy adjustment to your preferred angle, enhancing usability. Powered by a 2000mAh large-capacity lithium battery, it delivers long-lasting performance for extended lighting needs. Designed for demanding environments, this headlight is the perfect companion for helmet-mounted, hands-free lighting.

| Product features: | <ol style="list-style-type: none"> 1. The lens is made of modified polycarbonate material, $v50 \geq 190\text{m/s}$, and the eyes will not be hurt by high-speed ballistics after wearing. 2. The lens uses a unique process. At a water temperature of 50 degrees, the inner surface will not fog for a long time, and the field of vision will not be affected by fogging during use. 3. The goggles adopt a multifunctional structural design, and the temple shape can be switched to a strap shape, which is firmly worn and will not fall off. 4. The goggles adopt a multifunctional structural design, and the transparent lenses can be replaced with brown polarized or yellow light enhancement, which does not hurt the eyes in strong light and can see clearly in weak light. 5. The goggles have large and small sizes, and you can choose the right goggles, which are more comfortable to wear and have good ergonomics 6. The nose pads are made of silicone material, which can be adjusted freely, adapted to different face shapes, and comfortable to wear. 7. The nose pads adopt a unique structure and can be matched with myopia frames, which are suitable for people with vision correction. 8. The goggles adopt a unique structural design, which is light and comfortable to wear. |
| Applicable scenarios | Shooting training, combatants, commanders and fighters, combat readiness duty, border patrol, army soldiers' eye protection, effectively preventing potential eye injuries encountered on the battlefield, training, and duty. |

| Product features: | <ol style="list-style-type: none"> 1. The protective glasses have strong environmental adaptability and meet the requirements of GJB-150A-2009 "Military Equipment Laboratory Environmental Experiment Methods". 2. The protective glasses have the functions of anti-glare, anti-ultraviolet, anti-ballisticsation, anti-fog, and anti-dust. 3. The main components of the protective glasses are: lenses (Laser Protective Lens / Smoke Lens / Clear Lens), frames, fixing straps, storage bags, lens cloths, and lens boxes. 4. The protective glasses can choose Laser Protective Lens / Smoke Lens / Clear Lens according to the use environment. |
| Applicable scenarios | This product is designed for security officers, offering high reliability and excellent optical performance. Its attractive design incorporates multiple protective features, including flame resistance, ballistic protection, anti-glare, laser defense, UV shielding, dust prevention, and fog resistance. The lightweight construction includes built-in accommodation for prescription lenses and compatibility with night vision goggles. Suitable for harsh environments such as deserts and cold regions, it safeguards eyes against dust, intense light, lasers, and ballistic threats. As eyes are crucial organs for security personnel, addressing eye protection is of paramount importance. This solution effectively tackles that critical need. |
| Applicable scenarios | Shooting training, combatants, commanders and fighters, combat readiness duty, border patrol, army soldiers' eye protection, effectively preventing potential eye injuries encountered on the battlefield, training, and duty. |
